EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Applicant's attorney, Mr. Eric J. Nuss, Registration No. 40,106, on 10/31/05. The application has been amended as follows:

IN THE CLAIMS: Delete claims 7 through 19.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a) because they fail to show: a reference voltage V_{in} (claim elements: "a driving voltage" recited in claims 1 and 4), the reference number "32" is replaced number "36" for "the compensation voltage setting part" illustrated in Figs. 6 and 7, the reference number "32" is replaced number "40" for "the compensation voltage setting part" illustrated in Fig. 9, as described in pages 2-6 of the amendments to the specification submitted with the amendment received 2/22/05. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing

should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

3. Claims 1-6 are allowed.
4. The following is an examiner’s statement of reasons for allowance:

The present invention is directed to a liquid crystal display panel provided with thin film transistors and a method for setting a compensation voltage for adjusting a charge time of each thin film transistor. Each independent claims 1 and 4 identifies the uniquely distinct features: “a timing controller (12)”, “a frequency detector (30)”, “compensation voltage setting means (32)”, and “a voltage converter (34)”, and “the voltage converter generating a compensation voltage based on the compensation voltage control signal and a driving voltage outputted by the host system so as to adjust a charge time of the thin film transistors and delivering the compensation voltage to the liquid crystal display panel” (see figure 3). The closest prior art, the Takeda (U.S. Patent No. 6,456,268) discloses a similar liquid crystal display panel capable of setting a

compensation voltage for adjusting a charge time of each thin film transistor. However, the Takeda document fails to anticipate or render the above underlined limitations, which are specifically arranged for performing other claimed limitations, obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
